

REPORT

2.2.1

TUTORIAL AND MENTORING SYSTEM

The Tutorial and Mentoring system is effectively working in the college. The concerned tutors collect the personal and academic details from each student. They assess their academic level and give proper advice to improve their studies. Tutors are fully aware of the student's family background, economical factors and personal problems. The teaching faculty help students who need food or any other assistance. During mentoring session, if any psychological problems are identified, they are directed to Department of Psychology for counselling. A student can approach his tutor at any time and consult his personal and academic grievances. The tutor closely monitors his University performance and gives him necessary instructions.
