

## **NATURE CLUB REPORT 2016-2017**

The club members comprised of 25 students. A meeting was conducted 10.10.2016 for the discussion of this year's activity. An awareness class was given to the students about the importance and protection of nature. Students were taken for a one day tour to Kadalkani para, near Karatte. Kadalkani para was a centre of attraction for many tourists. We came to know the pathetic condition of the place as it was dumped with plastic waste. The club members along with National Service Scheme picked the plastic waste and cleaned the respective area.

Vegetable cultivation is done as per the last academic year. To make the club more creative, Sunflower seeds were planted for a change. To all our surprise, Sunflower blossomed as we dreamt. This created a positive energy to the members and led to a project of a garden in our college by Nature Club.
