

Annual Report of Nature Club 2017-2018

Preservation of nature is the utmost aim of each and every individual. A pollution free environment is essential for all living beings. The advancement of science and technology made our young generation least concerned about nature. Nature club was formed to sensitise, motivate and educate students about environment and conservation. The students should understand the value of nature and different environmental problems.

Nature club has about 60 students from all the department. They strive hard to develop a love of nature, protection of environment and campus. The theme for Environmental day was 'BEAT PLASTIC POLLUTION'. As per the theme club celebrated Environmental day by holding a ten minute awareness campaign regarding plastic pollution. Under the leadership of Vishnuchand of B.sc. the campaigning was done by Ijas from B.com and Haseena from TTM. They campaigned about the disadvantage of plastics that we throw carelessly. They stressed the example of Albatross bird that lived in Midway Atoll. The Club decided to provide a bin to dump plastic wastes. Later plastics were collected from the classroom and campus. Plastic free campus is the aim of the club and college. As this day meant to plant trees, principal in charge Dr.M.S.Noufal.

JUNE 5 ENVIRONMENTAL DAY

Planting a sapling of Mullathi

Campaign against disadvantage of plastics

Providing bin to dump plastic waste

.ONE DAY CAMP

Two one day camp was conducted on 16/12/2017 and 8/9/2018. On 16/12/17 a meeting to venture herbal garden. For the purpose students cleaned the campus. On 8/9/17 students started their loved project of Herbal Gardening. The area was uneven and rough. It was a great challenge for the students. They scooped the soil with the spade and uprooted climbers. Students were provided lunch. On all evenings students work hard for their assigned task. The area is further divided into 4 plots. The project of gardening is under progress.

Scooping and cleaning for herbal garden
