Nature Club Report 2018-2019

The club comprised of 50 students from B.A,B.SC,B.Com and TTM department.It was formed to sensitize the importance of nature in this fast advanced globalised world.The aim of our college and Club is eco friendly and plastic fee campus. The new members of the club were given by a warm welcome by the senior club members .They gave friendly talk regarding our work in progress. Nature club merged with WWS and NSS thus conducted a meeting for the students by the club coordinators for plastic free campus.They campaigned considering the mentioned topic.

As kerala witnessing a harsh and humid climate students were distributed saplings and growbag to make them grow in their home.Sukanya ,Raihana and Abhiraj brought some plants after growing at home to college.Cabbage ,Cheera,tomato,chillies were the vegetables grown by them.Regular watering and removal of weeds were done accordingly.Some ayurvedic herbs like "Aloevera,Kaiyonni,brahmi,vayambu were purchased from palode ayurvedic farm as part of herbal gardening.At the same time for gardening we purchased Melestomia,Rose,bougaivilla from evergreen nursery kallara.The best volunteers of the last academic year was given prize on college day and consolation prizes for the active members of the club.

A nature camp was organised on 23|1|2019. At Agri farm Peringamala. There were 55 students from the club for faculty members visited the farm. We started our journey at 10 am from the college and reached there at 11:30 am. There were two farm,firstly we reached Banana farm. There we could see variety of banana cultivation. The entrance decorated with different kinds of flowers and fruits. Spending some time there and collecting information regarding the cultivation from the officer Maya. We moved to Jilla farm(Jilla Krishi Thottam). There we were welcomed by the agriculture officer Suresh Kumar. The entire history of the farm was shared by the officer.He said that it was established in 1964 as a single unit and later split into two as ' banana farm' and 'Jilla Krishi Thottam'. A 'waste to energy plant' is to be set inside the farm but the proper place is not yet identified by the government. ' Samara Panthal' is set up by the native dwellers to protest the mission of the government as the place is unfit for such a project were lives thousands of people. The officer reported that there is no empty area to set up this life warning project as the farm is fully under cultivation. He walked along with us to show their cultivation. They use only organic waste as fertilizer for the growth of plants. We could see passion fruit in its initial stage, cocoa plants bearing fruits, hybrid Jampa, Sapotta, Coconut, different species of Jack Fruit tree etc. A stream and pond to freshen the mind and body of visitors and the peoples there. There were saplings of bud like Thailand Jampa, Jack fruit, Mango Trees, Rambuttan, Njara etc and vegetables like Brinjal, chillies, tomatoes, aloevera and the like. There were also rich garden setting. Beginning from the Orchid and Rose we can end up by 10 'O' clock flower. We had a grand lunch from the farm canteen departed from there at 3 pm.
